Aluminum Forms Capital Source says

you can!

A.F.C.S.

Aluminum Forms Capital Source

A division of Security Leasing Services, Inc.

OUR FINANCING PROGRAMS ARE MATCHED TO YOUR NEEDS.

Low monthly payments and minimal upfront costs are great incentives for choosing our leasing and other lending products rather than another type of financing. But they are not the only reasons to look seriously at non-bank lending and at us as your lender/lessor.

With our highly evolved programs - proven over many years of service - you can get the equipment you need simply and quickly, without tapping your bank credit lines. Further, these programs preserve your borrowing power for other opportunities. And unlike some offerings, our financial products - **Express Lending** and **Commercial Lending** - can be structured to fit your business needs. We offer a wide range of flexible payment plans and end-of-term options for the foundation contractor.

With our dedicated team of customer service representatives, we make it quick and easy. Start to finish, we're here for the life of your financial products, offering a fast response to every question and need.

Over the years we've helped companies large and small meet their objectives and capitalize on a vast range of business-building opportunities. With our creative financial solutions, we can do the same for you.

OUR EXPRESS FINANCING CAN HELP YOU TODAY.

Express sets the standard as the industry's fastest, and most flexible source of funding for Aluminum Concrete Forms and other related equipment.

Featuring:

- Credit from \$2,000 to \$75,000 often without financial statements.
- Straightforward credit policies.
- Competitive rates.
- Fast, professional service.
- Flexible payment programs.
- New & used equipment.

Express can accommodate a wide variety of equipment types, as well as a host of terms, payment plans and end-of-term options. Plus, it offers outstanding service benefits.

For example, an eight-hour credit decision is often available on **Express** transactions. And with our **Express Plus**® service you may qualify to receive automatic approval for additional credit that can be used immediately to acquire one or multiple pieces of equipment.

In foundation construction equipment financing, there are never any "one-size-fits-all" solutions, so we seek to tailor our programs to your unique situation.

OUR COMMERCIAL LENDING CAN ACCOMMODATE.

If your financial needs exceed the scope of our **Express** products, we offer additional products through our **Commercial Lending** programs. They enable you to finance the mid-range equipment you need without a major cash investment.

Features include:

- Credit up to \$10,000,000 for equipment.
- Competitive pricing.
- Flexibility in submission and funding.
- Prompt, professional service for the life of our business relationship.

These products can help you solve your most complicated equipment acquisition problems with a variety of terms, payment plans, and end-of-term options. Through these products we look at all the variables, taking into account not just financial statements but the complete credit picture.

From credit decisions to funding to administration, we're organized to deliver quick responses and superior service, including expert advice on terms and structuring. We want to make sure our lending works to your advantage, building competitive power and profit - fast.

A.F.C.S. WILL KEEP YOUR BUSINESS GROWING.

To stay ahead of the competition and make your company more profitable, you need the latest and best equipment available. But can you afford it, without putting unnecessary financial pressure on your business?

Yes, you can - with Aluminum Forms Capital Source as your financial partner. Our financial products are easy to qualify for and can be tailored to meet specific needs, providing real cash-flow advantages without a major cash outlay. With our help, your company can put the equipment you need to work for you immediately.

- Provides 100% financing with reduced up-front cash outlay compared to other forms of financing.
- Lines of credit remain free for other uses.
- Payments are usually lower than with other methods of financing, so you may actually be able to afford even more of today's best cutting-edge equipment.
- Unlike bank lines of credit with variable rates, our products provide payments that are fixed - no matter what happens to the market tomorrow.

Non-Bank Financing is one of the fastest growing ways of financing equipment in business today, used by companies of every size to gain leverage for growth. In fact, more than 80% of all U.S. companies obtain financing from sources other than their bank. They recognize that it doesn't take huge resources to grow a business. Just big thinking about how to get where you want to be, faster, with a proven source of funding.
