**The World's Strongest Swimming Pool**

# What people don't know about designing concrete vinyl lined pools. . .

Our Forming System enables us to design pools in almost any shape and size. This gives you the option to choose from traditional geometric shapes like rectangles, grecians and L-shapes, or free form shapes such as lagoon style pools.

**We offer many styles, sizes and shapes**

Vinyl lined concrete walled pools are assured to have more strength and durability than kit pools and offer these unique benefits:

- 10 inch steel reinforced poured concrete walls
- Fully integrated monolithically poured concrete steps
- Design flexibility
